- Java
- PHP
- JavaScript
- CSS/XHTML
- XML/XSL

### Advanced

- Python
- SQL (MySQL & PostgreSQL)
- Actionscript
- Flex
- Photoshop

### Familiar

- Linux
- Ruby
- C

## EXPERIENCE

### Blazonco - Web Developer

*June 2008 - Present*

Development of impressive CMS, Blazonco.com. Integrated various high-profile clients into our system, and built custom plug-ins for them. Very Javascript-intensive application, and MVC PHP powers the back.

Technologies: PHP, PostgreSQL, XSL, Javascript, CSS/HTML, Debian

### McArthur GFX - Freelance Development

*October 2007 - Present*

Front-end and back-end development for web-sites. Creating standards-compliant CSS and XHTML for designers, crafting Javascript plugins, and implementing a CMS for clients built with CakePHP.

Technologies: PHP, MySQL, Javascript, CSS

### MooTools - Open Source Javascript Library

*July 2008 - Present*

Various unofficial MooTools plug-ins released, as well as contributions to the official MooTools More plug-in repository.

Technologies: Javascript, CSS

### Javaground, USA - Mobile Game Developer

*July 2007 - October 2007*

Javaground, USA is a leader in the mobile industry, with their Xpress Suite allowing porting to thousands of devices, as well as translating from Java into BREW. I was a Game Developer there, and helped develop and troubleshoot original games from Javaground as well as ports of existing games. Games I had a hand in: Elevator Action, Raiden, Super Gadget, Townsman 3, Minigame Pack, Fish'N'Tunes.

Technologies: Java J2ME

## PROJECTS

### Blazonco

Blazonco is a WYSIWYG editor for websites. You can load a page from your site, and the content is divided into draggable components that you can move anywhere on the page. Editing just involves double-clicking and then typing away. Blazonco also features Ecommerce, Newsletter, Blog, Site User Management.

Powers websites for Marriott, UCI, LegalZoom, and others.

### Blazonco SuperAdmin

An internal CRM for sales people, CSRs, and developers. Allows easy tracking of leads, converting into sites, and easy addition of new addons and designs to Blazonco. Built in Adobe Flex.

### **Monstar-View-Controller**

A Javascript MVC framework in MooTools, built to create RIA applications in the browser that can be easily ported to Adobe AIR.

### **MooTools Rich Text Editor**

A rich text editor using MooTools and the Browser Midas API, making it light-weight and doesn't rely on iframes.

## **EDUCATION**

---

### **University of Arizona**

Computer Science focus.

*August 2005 - May 2006*
